

English, Sun and Ski in Cyprus? It's possible!

SKI & SUNBATHE IN CYPRUS

Cyprus is probably the only ski region in the world, where the names of individual ski lifts allow us to experience the Greek myths in addition to the unforgettable views even while climbing up.

Ski lifts and trails are situated in two places and they are not the most difficult. The northern part of the Olimpos crosses two ski lifts: Hera, 350 meters long and Zeus, 500 meters long. The routes for the others are for the advanced skiers. Without any worries beginners can ski down on the trail along Hera's.

Sun Valley also supports two lifts: Aphrodite and Hermes - 150 meters long each. On the route along the Hermes should ski more advanced skiers, Aphrodite is recommended for beginners.

Interestingly: on the northern slope of Olimpos, along the Zeus lift a 370 meter has received FIS approvals. The ski ride starts at 1920 meters and ends at 1800 meters.

To go skiing you do not need to have your own equipment. Taking a pair of skis and boots on the board of plane - could be embarrassing - even overweighted. Equipment rentals are available at both the Sun Valley and the northern slopes of mountain.

PRICE: 1 day ski 80 EUR if minimum 10 students are going

The price includes: the bus, 1 day ski pass, ski rent with shoes.
